### High Value, Low Cost Outplacement

Web-based Outplacement Services provide real-world job search training, tools and information — at a fraction of the cost of traditional brick-and-mortar based services. With Outplacement, your private label program can be launched in a matter of hours. Whether you have 10 or 10,000 employees — whether they're in San Jose or Saskatoon — they'll be organizing their job search with powerful ways to find their next opportunity.

### A New Paradigm

For decades major corporations have relied on expensive career management firms to help them transition their displaced executives.

But today's marketplace is very different. Today, employers are faced with a double challenge. On one hand, outplacement services aren't just for high-level executives anymore. HR professionals fresh from the talent wars know they will be re-recruiting many of their laid off workers within a year or two, and want to provide some form of assistance to ALL of them. On the other hand, there's simply not enough cash in the budget to offer expensive service to hundreds or thousands of workers at once.

### A Self Service Solution

CEO Inc. offers a fresh new paradigm that answers both needs. Web-based Career Portal, Job Seeker Tools and e-Learning allow you to offer a wide range of self-service outplacement resources to a much larger population of your workers... at an extra-ordinarily low cost.

### Refocus Your Budget on Growth

CEO Inc. helps you refocus your budget on growing your company. The key is to provide the maximum assistance to your departing employees at the minimum cost... and that is the point at which we've aimed Outplacement Services.

No other solution can match the high value of our training, job search tools and information.... And no other solution can match the low cost of self-service outplacement.
